

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

P R E F A C E.

IN introducing this our first edition to our friends, subscribers, and the public, we must express surprise, that, while so many towns in England have enjoyed the advantage of cheap Directories, Liverpool, one of the most important, has been overlooked. We, therefore, have compiled and published this at a price to bring it within the reach of all, and sincerely hope that our work will be found to contain everything that is essential in a Directory, and that it will answer the same purpose as a more ponderous and costly publication.

IN presenting a Work of this magnitude to the public, it would of course be impossible to present it faultless, but from the care and diligence with which it has been compiled, we trust the errors will be found exceptionally few.

NEXT year we shall annex a Street Directory, Annals of the Town, a Map, and other information calculated to be useful.

WE proffer our thanks to all for the kindness shown to us, and trust that our subscribers will feel satisfied with our efforts ; and by recommending our work to their friends, aid us in carrying out so beneficial an object.

# JOHN STARKEY AND CO.,

12 & 14, PARKER STREET, LIVERPOOL,

Have undertaken the Agency for what they consider the **Best**  
Sewing Machines now in the Market—

## THE FLORENCE MACHINE.

This Machine, the perfect result of several years of close study of the principles on which successful Sewing Machines should be made, has the following amongst other great advantages :—

It makes Four different kinds of Stitch, viz. : The Lock, Knot, Double-Lock, and Double-Knot. All of these are alike on both sides of the fabric.

It has the Reversible Feed Motion, which enables the operator, by simply turning a thumbscrew, to run the work either to the right or left, to stay any part of the seam, or fasten the ends of seams, without turning the fabric or stopping the Machine.

The Needle is easily adjusted.

It is almost noiseless, and can be used where quiet is necessary.

Its motions are all Positive, and its simplicity enables the most inexperienced to operate with it.

It does not require finer thread for the under than for the upper side, and will sew across heavy seams, or from one to more thicknesses of cloth, without change of needle, tension, or breaking thread.

The Hemmer is easily adjusted, and will turn any width of hem desired.

No other Machine will do so great a range of work as THE FLORENCE. It will Hem, Fell, Seam, Bind, Gather, Braid, Quilt ; also, Gather and Sew on a Ruffle at the same time.

---

**JOHN STARKEY & CO.,**  
**12 & 14, PARKER STREET, LIVERPOOL.**

---

THE NEWLY INVENTED  
**PATENT MANGLE,**

WITH SELF-ACTING FEEDER, CAN BE USED FOR WRINGING ALSO.

**Small Size, £3 10s. Medium, £4. Laage, £4 10s.**

The superiority of this Machine is, that a large quantity of articles can be placed in the feeder, then passed between the rollers, and requires no further aid till mangled, than to be replaced with more linen.

---

**NOA'S PORTABLE**  
*Washing, Wringing, and Mangling Machine,*

WITH PATENT SELF-ACTING MOVING MANGLING CLOTH,

**REQUIRES BUT ONE ATTENDANT.**

**Price £6 10s. If with Tables on each side, £8.**

The above Machines can be used by the most inexperienced person. The linen is thrown in loose on each side of the dasher, and by simply pushing it to and fro, with its double action, the linen is compressed between the ribbed interior of the Machine and dasher, forcing a flush of water in, through, and among the different materials, causing them to rebound and partially turn over, so that each swing compresses them in different positions, rendering it all but impossible for any part to escape a thorough cleansing.

This Machine will pass through a doorway 2 feet 3 inches wide, this being a great advantage when sent to a distance, and where room is limited. 26 inch roller will hold two blankets at once, or twelve sheets.

The immense number of Machines that bear their name in all parts of the world is sufficient testimony to their utility. The frames of the Machines are iron, and the rollers are made of well-seasoned wood, and so connected together that one roller cannot turn without the other. In all districts where the Machines are now in general use, and wherever they are fairly put to work, the saving of time, soap, labour, and material is so great, they soon pay for themselves. The wringing is effected by pressure instead of friction, causing less wear and tear of the linen than when done by hand, which is well known to be very injurious to linen.

---

Printed directions for use given to each purchaser.

Any of the above Machines neatly packed for land carriage free of charge, also packed for export free, except the price of case.

NOTICE.—RAPID DELIVERY OF LETTERS.

The **POSTMASTER GENERAL** is desirous of again calling attention to the increased rapidity in the delivery of Letters which would result from the more general adoption of **HOUSE-DOOR LETTER BOXES**.

It is hoped that those Householders who have not hitherto provided Letter Boxes will not object to do so; as by that means, at a very moderate expense, they can promote the convenience both of themselves and of their neighbours, and at the same time render an important aid to the Public Service.

GENERAL POST OFFICE, January, 1866.

To prevent **LETTERS** being delayed or wrongly delivered, it is very desirable that they should not only be plainly but fully addressed. No Letter should be directed merely to Liverpool, but either the Residence or Place of Business of the person for whom it is intended should be specified in the Address. The Number of a House, too, if in a Street, is a great assistance; and it must not be supposed because a Letter will eventually reach its destination without a number, that the omission is not a cause of hesitation and delay in the process of Sorting and Delivery.

## T E A

Shipped from China this Season; therefore, from the very large arrivals in London, we have been enabled to make very choice selections of such Teas as will suit our Liverpool Trade. We have also made special purchases of very fine KAISOW CONGOU, the first crop of this year's growth.

The increasing consumption of our fine Teas, the fair fame of which continues to mark the steady progress of our business, is owing to our long experience and practical knowledge, combined with our entire attention to the Tea Trade and the great care in selection of Stock to the advantage of our customers, which it is pleasing to know has resulted in securing the confidence of the public and the great increase of our trade.

Our country customers will do well to make early purchases of these Teas, as they are rarely to be met with in the market, and cannot be surpassed by any house in the trade.

## CHEAP TAILORING

Has never found great favour with the public. "Cheap" has long been a court expression for poor material, bad workmanship, a showy but transitory appearance, and a handsome profit to the economical clothier. There are, in fact, grounds for the objections raised against "Cheap Tailoring."

To prove, however, what can be done at a moderate price, and to show the distinction between "cheapness" and economy proper, I am making a leading article of two garments, namely,

### The 25s. Overcoat and 15s. Trousers.

For the Overcoat, the materials are Witney, Beavers, Meltons, Tweeds, and Naps; for the Trousers, every description of Fancy Tweeds. These garments can be recommended in every respect, the material contained in them being of a quality generally used for a much more expensive class of goods; and their production at the price is only effected by large wholesale cash purchases, attention to details, ready retail sales for cash, and very small profits. The cutting, trimming, and workmanship are excellent alike, and I am certain that the 25s. Overcoat and 15s. Trousers will maintain the desirable reputation which attaches itself to my establishment.

**FOR THE SAFE AND ECONOMICAL USE OF GAS.**

No house in which gas is used should be without Carnaby's Patent Safety Gas Apparatus. It may be fitted in any part of a house, and gives the occupant immediate and full control of the gas throughout the premises. By it the supply of gas is regulated before it enters the house pipes & passes through the meter. The exact quantity which the burners require being thus admitted, perfect combustion is obtained, a considerable saving effected, and the unpleasant odour and heat which so frequently attend the wasteful and careless use of gas are avoided.
